 Pavlivska Meydanı No: 10,
61003, Harkov

WE WOULD LIKE TO MEET:

Hafif sanayi: kumaş, iplik, dikiş aksesuarları, dikiş ekipmanları.

Tarım sektörü: tarım ekipman, tarım ekipman için yedek parçaları.

Diğer endüstriyel ekipman.

TECHSNABCOMPLECT SERVICE

tehsnab.com.ua/

YEAR ESTABLISHED **2001**

NUMBER OF EMPLOYEES **20**

Eduard Margarian

CCO

margarian-ek@tehsnab.com.ua

Our enterprise, "Techsnabcomplect Service", is a Ukrainian based company, founded in 2001, in Ukraine. We provide a full range of low voltage solutions to connect, protect, control and measure a wide range of electrical installations, enclosures, switchboards, electronics and electromechanical devices. The business improves the reliability and efficiency of its customers' activities across all major industries including mining and metallurgy.

69095 Ukraine, Zaporozhye
Oblast, Zaporozhye,
Ukrainskaia street 32/77

Our team has an extensive experience in the implementation of various projects such as the sport stadium power supply, the Boryspil airport power supply project, the upgrade of the control system of the oil platform in Norway and several crane and lifting systems in Ukraine, Russia and Kazakhstan.

PRODUCT / SERVICES

We offer a range of services and products, such as:

- manufacturing and delivery of electrical equipment, automation equipment, software;
- scheming and adjustment of energy and electricity systems, automation systems, systems of uninterruptible power supply;
- erection works, commissioning works;
- manufacturing of low-voltage complete devices of various configurations and modifications;
- manufacturing of electricity closets, boxes and control stations and automation systems;
- development and adjustment of automation process control systems;
- after-sales support services.

WE WOULD LIKE TO MEET:

We are highly interested in partnership that would allow executing joint projects in Turkey and Ukraine.

Metal, mining and construction industries are the fields where we're looking for potential customers to work with.

Paton Pilot Plant of Welding Equipment

paton.ua

 YEAR ESTABLISHED **1959**

 NUMBER OF EMPLOYEES **400**

We produce the full assortment of professional welding equipment and is the leader of the market of welding apparatuses on the territory of Ukraine and the CIS countries. The Paton Plant of Welding Equipment implements advanced manufacturing sciences and engineering designs to produce the high quality welding equipment with optimal specifications which provides the needs of big industrial enterprises as well as of private individuals. On orders of the Institute of Electric Welding named after Ye. O. Paton the Paton Plant of Welding Equipment produces surfacing units, equipment for machine-building plants and agricultural machinery industry, installations for electroslag welding and remelting, automated control systems for welding equipment, etc. The Paton Plant of Welding Equipment implements new technologies of high-performance and energy-conserving automated hidden arc welding, technologies for mechanized and automated pulsed arc welding. The Plant develops technologies and produces equipment for welding of nonrotational main pipeline couplings as well as unique apparatuses for automatic arc solvent sealing welding of girth seams in deep cutting including those for rotors of high-power turbines for Turboatom enterprise.

Daria Sielina

Head of Sales Department

d.sielina@paton.ua

cell/viber/whatsap:

EFFI is the only Ukrainian manufacturer of an energy efficient heating and cooling system for non-residential premises - the EFFI climate panels. Water radiant ceiling panels allow to reduce heating and cooling costs by up to 50% and create perfect indoor climate. The technology of water ceiling panels is known in the world for more than 50 years and getting more popular due to energy saving and environmental aspects.

EFFI is a family owned company. Huge attention is paid to climate panel's quality, new developments, technical and marketing support for our partners and the smallest details of our work.

PRODUCT / SERVICES

We produce an energy efficient heating and cooling system for premises with high ceilings: production halls, car shops, logistics centers, sports and exhibition halls, supermarkets, etc. The production is located in Kharkiv, Ukraine. The components of European production and extensive experience in this technology allow us to create a competitive product of high quality, which is in demand both in the Ukrainian and European markets. Products are sold exclusively through a dealers network. We are open to finding new partners abroad.

WE WOULD LIKE TO MEET:

Manufacturers of similar products:

Companies, who produce similar products in the heating segment, and EFFI climate panels could spread their products portfolio.

These could be manufacturers of:

- standard radiators (radiators are sold to residential market; and now they could spread to non-residential market);
- boilers (they sell boilers, and with EFFI they could sell complex solution: 'heat source + heating system')
- air heating products;
- gas or electrical infrared heating systems

In this case we offer OEM cooperation – we will produce climate panels under their brand.

 YEAR ESTABLISHED **1954**  NUMBER OF EMPLOYEES **1600**

PJSC “Energomashpetsstal” is the largest Ukrainian manufacture of special forged and casted products of individual and small-scale production for metallurgy, shipbuilding, energy (wind, steam, hydro, nuclear), and general engineering.

The company has the latest metallurgical, metal and machining equipment, and is capable to perform the complete production cycle – from generation of marketing and technical ideas up to its materialization into finished products.

Ivanyuta Oleksiy

 Chief of sales department shipbuilding and semi-finished products

a.ivanyuta@emss.dn.ua

 84306, Kramatorsk, Donetsk region, Ukraine

PRODUCT / SERVICES

Branches of activity of the enterprise:

1. Power industry, Nuclear Power Station:

- rotors of steam turbines
- generator rotors
- rotors for wind mills
- runner hubs
- cylinder bodies
- hydro shafts
- steam generator shells
- shells of reactor body
- bottom of reactor body
- parts of main circulation pump and main circulation pipeline
- parts of steam generator collector of reactor units WWER-1000, WWER-1200

2. General machinery and oil-and-gas-and-chemical industry:

- different types of cylinder
- traverses
- body casting
- housings
- gear wheels
- ring gear
- crossbars
- plugs

3. Metallurgy :

- backup rolls for hot and cold rolling
- work rolls for hot rolling
- rollers
- spindles

- clutches
- slag ladles
- mill housings
- main bases
- die holders

4. Shipbuilding:

- propeller shafts
 - intermediate shafts
 - rudder spindle
 - tail-shaft
 - the blades and hubs of the propeller
 - parts of electrical machines.
-

WE WOULD LIKE TO MEET:

A representative of the meeting is the Commercial and Industrial Association of Shipyards and the Shipbuilding Shipyards, the companies of the metallurgical industry, wind power companies.

Scientific-Production Enterprise «Alians-D»

<http://alians-d.ua>

 YEAR ESTABLISHED **1999**

 NUMBER OF EMPLOYEES **20**

Smovzh Oleksandr
 Director

Since 1999, Scientific-Production Enterprise «Alians-D» has developed, manufactured and commissioned equipment designed to automate technological processes, increase productivity and ensure safety at mining enterprises (coal and ore mines).

All major mining enterprises in Ukraine (Krivoj Rog Iron-Ore Plant, Zaporozhye Iron-Ore Plant, ArcelorMittal Krivoy Rog, Sukha Balka, DTEK Pavlogradugol) use our equipment, it works abroad too (Uzbekistan and the Russian Federation).

 mail@alians-d.ua
49038, 5A, Ak. Belelyubskogo street, Dnipro

PRODUCT / SERVICES

Electric haulage control system provides centralized automated dispatcher (including from the surface) control of the operation of mine electric locomotives that transport rock mass at the underground horizons: allows to lay routes, controls traffic signals, railroad switches, and also provides voice communication through the contact network between a surface dispatcher and electric locomotive operator.

The shaft signaling and communication equipment provides coordination of actions of the maintenance personnel at the hoists while transporting loads, equipment and people, as well as voice communication, issuing commands, emergency signals and equipment status signals from the horizons and directly from the lifting vessel .

The dosing control equipment provides automatic control of the process of loading skips on the basis of continuous strain gauge weighting of the rock mass supplied to the metering hoppers.

The level control equipment provides a contact-free, automatic measurement of the level of rock mass supplied to the hoppers.

Information on the operation of the hoist, dosing equipment, level of the rock mass in the feed hopper and status of the controlled mechanisms are archived on the server and displayed on the monitor of the operator's workstation.

The underground mine substation telemechanic equipment performs functions of the remote control, control and emergency alarm system.

The rope tension control equipment performs continuous reading and recording of the results of measurements of the hoist rope tensile stresses. At the discharge point, these data are automatically transmitted over the wireless channel, and then processed and stored on the computer. The use of these data significantly (up to 20 %) extends the service life of the hoist ropes.

Developments are patented, supported with certificates for copyright registration.

WE WOULD LIKE TO MEET:

Mining enterprises or enterprises involved in the integrated supply of mine equipment for underground (coal and ore) mines.

Tribo Ltd. is the largest manufacturer of friction products in Ukraine. Our main customers are located in CIS countries, Great Britain, Ireland and South Africa. Historically Tribo's OE and aftermarket customers were situated in CIS countries and former republics of the Soviet Union. In recent years though and under private ownership Tribo Ltd. has managed the transition from an old soviet style plant to a modern production facility. A new R&D facility with a state-of-the-art inertia dynamometer built in Western Europe has been completed in 2014. Most recently our newly established test laboratory "Eurotest" achieved accreditation to ISO 17025. Modern machining center is now working round the clock to produce not only molds and tooling for internal customers but is also open for business with third parties.

Zakolyukin Sergey

 Director

We combine the highest Germany Quality and Reliability of SMS Group Service with Ukrainian highly skilled Personnel

sergey.zakolyukin@sms-group.com

 87515, Mariupol, Karpova, 58

PRODUCT / SERVICES

SMS Technical Service LLC is a part of SMS Group GmbH in Ukraine.

A special focus of our service point is capabilities that cover everything: from standard spare parts to repairs and modernization, technical support, warehousing, consignment stock, training, and electrical and automation systems.

Superb services we provide for you:

- Reliability Engineering processes
- Plant Optimization
- Predictive Maintenance System using IMMS
- Inventory Management including warehousing and consignment stock
- Technical Outsourcing service
- High Quality technical services
- Advanced safety and environmental service

Here at SMS Technical Service, we offer you comprehensive maintenance and spare part services – all from a single source:

- Caster molds – complete mold rebuilds, mold copper machining and coating
- Oscillators – end unit rebuilds and oscillator monitoring
- Caster segments – segment refurbishments, complete roll cladding capabilities
- HSM – roll repairs, shifting blocks, chocks, spindles, gears, and AGC cylinders
- CM/CGL - work roll chrome and EDT services, chocks, Zn pot rolls, and equipment

To successfully meet or even exceed all your wants and needs, we have built up a wide range of expertise that covers the entire metallurgical process chain. Also included in our strategy are tightly coordinated business units and customer-centered processes. Our workshops in the high-demand regions of the world ensure consistent quality standards synchronized to your specific expectations.

You are virtually bound to succeed with the synergies provided by our various service packages. Put together your own mix of outsourcing, IMMS, RCM, warehousing, predictive maintenance, training, and consulting. All our services draw on the experience of the whole SMS group. You'll benefit from better plant performance and product quality plus much lower final production costs over your entire production line.

Our first production of semi-automatic washing machines started in 2009 in Kanev city, Ukraine. Up today, washing machines produced by Kupava Group, are still popular among all residents of small towns and villages. After successful start-up of washing machines project, Kupava Group took a decision to invest in development of new categories of home appliances. Later on, such projects as electric kettles, food dryers, hand mixers, fan heaters, meat grinders – were launched. Along with small home appliances, Kupava Group took a decision to make extra investments in development of white goods. Thus, in 2015, new factory in Cherkassy city was purchased to produce different kind of white goods and small home appliances containing metal parts, such as refrigerators, electric ovens, convector heaters, standing fans, metal electric kettles. In manufacturing process, both factories use most modern and advanced equipment with active participation and control of leading Chinese engineers.

Nasonov Ivan

 Executive Director

in@kammash.com

Our company "Kamyanka Machine-Building Plant" Ltd is the leader in Ukrainian market that produces gear pumps for metering and injection of viscose and cellulose acetate solutions, melts of polycapramide and polyethylene-terephthalate, which are analogue to "Barmag" pumps. Also we produce the oil-pumping aggregates for plants of metal industry. We have been selling our products to such countries as Belarus, Kazakhstan, Poland, India, Bulgaria, China etc. for a long time and could assure our potential Customers in high quality of our products and flexible price policy.

 20800, Kamyanka, Cherkassy region, Ukraine, Heroiiv Maidanu Str., 40,

PRODUCT / SERVICES

Gear Pumps for metering and injection thane solutions on machines for manufacturing chemical filaments. Variation: one-flow and multi-flow. Productivity from 0.3 cc./revolution to 250 cc / revolution.

Pump are manufactured from materials possessing high wear resistance. Each pump is tested at special stand for value and non-uniformity of feed.

Gear Pumps for metering and injection solutions of viscose and cellulose acetate are mounted on machines for manufacturing chemical filaments.

Gear Pumps for metering and injection melts of polycapramide and polyethylene terephthalate are mounted on machines for manufacturing chemical filaments.

Gear Pumps for metering and injection melts of textile-auxiliary agents are mounted on machines for manufacturing chemical filaments.

Gear pumps type Г11, unit pumps on its basis of type БГ 11 are designed for injection under nominal pressure 2,5 Mpa (2,5 kgs/sm²) of constant by size and direction of stream of mineral oil with kinematic viscosity from 17 to 400 mm²/s (sSt) in oil temperature from 283 to 328 K (from 10 to 55°C) in lubricant systems of machines.

Gear oil pump of type HШМ and unit pumps on its basis of type АНШМ is used for pumping petroleum products (oils, petroleum, fuel oil) and also for fuel oil delivery in boiler units, without mechanical impurities with kinematic viscosity of 75 mm²/s (sSt)...1800 mm²/s (sSt)(10°BY...250°BY) power fluid temperature from 10°C to 70°C.

Eccentric bucket pump H403E (Y), H401E (Y), H400E (Y) is designed for metering of straight mineral oil in hydraulic systems of machine tools, presses, lifts and other working machines that require unstable productivity and high pressure.

KARPATNAFTOCHIM Ltd. is a petrochemical complex, situated in the western region of Ukraine in the town of Kalush, at a distance of 35 km from the city of Ivano-Frankovsk and at a distance of 110 km from the city of Lviv. Karpatnaftochim is an exclusive producer of the following products in Ukraine: ethylene, propylene, benzene, C9 fraction, polyethylene, caustic soda and suspension polyvinyl chloride. The multi-branched network of automobile roads and railways, close distance to borders with Poland (200 km), Romania (250 km), Hungary, Slovakia (300 km), availability of ethylene pipe line between KARPATNAFTOCHIM Ltd. and Tiszai chemical amalgamation in Hungary creates favorable preconditions for the integration of the enterprise to the European industrial and trade activity.

Mamedov Ilkham

 Chairman of the Supervisory Board

MamedovID@knh.com.ua

 77306, 4 PROMYSLOVA STR., KALUSH, IVANO-FRANKOVSKY REGION

PRODUCT / SERVICES

Technological process is based on high temperature pyrolysis of hydrocarbon feedstock and low temperature separation of pyrolysis products.

Primary products: ethylene, propylene, benzene.

By-products: Fraction C4, Fraction C5, Fraction C9, heavy pyrolysis resin.

The main product is ethylene, that is used as raw material at polyethylene production plant and vinyl chloride production plant. Ethylene can also be exported to the Hungary via pipeline.

Additionally, methane/hydrogen is produced as a result of the plant's operation. Karpatnaftochim Ltd policy is to conclude direct long-term contracts with customers on the basis of transparency and fairness.

Monthly sales of finished product are ≈60 000 tons which are sold to more than 100 customers at different countries. Most of the products were exported. Share of domestic sales is 32% in total sales.

The main share in total sales is PVC (≈19 000 tons per month on average), caustic soda (≈13 000 tons per month on average) and polyethylene (≈8 500 tons per month on average).

IMMER Group is one of the leading European flexible packaging manufacturers, offering comprehensive solutions for its customers, with fully integrated production of polypropylene films, blown co-extrusion polyethylene films of up to 11 layers, including complex products, such as twist films, barrier films, biodegradable mulch films, labels, self-adhesive labels and finished pouches. The international group bridges two plants in Ukraine and in Latvia, with its own R&D, in-house design studio and offices in key markets. The products manufactured meet environmental and legal standards in all markets, including the EC and the USA, and are exported globally. IMMER Group produces interactive packaging with anti-counterfeiting features, hidden coding, Track & Trace and other advanced high-tech solutions.

PRODUCT / SERVICES

Flexible packaging materials and ready-made pouches for food and non-food products. The company produces BOPP films; blown coextrusion up to 11 layers PE based films, including twist films, barrier films, biodegradable mulch film, metallized films, solvent-based, solventless and coextrusion laminates, and ready-made stand-up and flat pouches. Manufacturing involves hi-tech design tools, digital and laser equipment in pre-printing processes, stochastic screening, UV printing inks and varnishes and other technologies.

WE WOULD LIKE TO MEET:

LLC BALEX Company

yeast.com.ua

 YEAR ESTABLISHED **1992**  NUMBER OF EMPLOYEES **134**

BALEX Company was launched late in 20th century as a production of pressed (fresh) baker's yeast. True revival of the company started in 2002 due to fundamental reconstruction of the plant and equipment upgrade with modern European production facilities. Since 2006 BALEX supplies yeast in Europe and we steadily enlarge our presence in the world. Today we are a modern company, opened for new ideas and carefully saving family traditions in bakery.

Production processes are organized in such a way so as to reduce human influence and avoid contacting the goods on all stages of manufacturing. This principle is implemented with the help of Siemens automatic control system. We do not add any kinds of coloring agents, preservatives, improvers or antibiotics into our product, and only owing to high production culture, professional skills of our specialists and the best equipment we create yeast, which retains highest quality parameters unaltered within 35-day shelf-life.

High quality of our products is the result of permanent technology development and implementation of quality and safety control systems in accordance with ISO 9001 and ISO 22000 (HACCP).

The Production Complex of the Company was put into operation in August, 2009 being the object of remanufacturing. The Factory is fitted with advanced high-tech equipment from the leading global manufacturers. The production equipment was manufactured to the Company order.

Production lines give the opportunity to output up to 800 tons of finished products per month and exploit different technical processes of fish and seafood processing. At a given moment, over 200 species are produced at manufacturing facilities in 5 production branches, namely:

- Fish and seafood processing and packaging branch;
- Fish semi-finished goods production branch;
- Preserves production branch;
- Roe and delicacy production branch;
- Dried fish production branch.

The range of products is wide and varied:

- frozen fish of various processing and seafood;
- preserves group: herring, mackerel, salmon and other fish species;
- preserves seafood group: in oil, in brine (salted);
- breakout roe, caviar;
- roe in sauces, shrimp and roe pastes;
- fish mince, burgers and other semi-finished products;
- a wide range of dried fish & snacks.

In 2013 the Company successfully passed the ISO22000 Certification procedure (HACCP), being the subject of additional confirmation of high-quality goods manufactured. The Quality department of the Company on a full-time basis micromanages the every stage of production process: from the inward raw materials controlling at the Factory and within the processing, to storage of finished goods and its transportation to the point of sale. The accredited Laboratory of the Company arranges the researching procedure on chemical and microbiological indices at each production stage. Due to the strict compliance with all the requirements and rates of European standards regarding to food manufacturing, the Company was assigned to the European approval number 08-22-29 FP.

The Company being the manufacture of high quality products is trusted by the leading retail of the country (Auchan, Metro, ATB, Silpo and others). The Company passes annual inspections by independent auditors authorized with the largest national and international retail, which once again confirms the Company's credibility of the leading retailers as a partner and manufacturer as well.

Stable Production processes, balanced labor management system and qualified personnel, give us an opportunity to be proud of our Company.

AGROXY UKRAINE LTD

agroxy.com

 YEAR ESTABLISHED **2016**

 NUMBER OF EMPLOYEES **10**

 CEO

Dresviannikova Nataliia

ceo@agroxy.com

Agroxy is an ecosystem (is an IT platform) of interconnected regional agro commodities marketplaces. We developed specialized agro commodity marketplace platform with own CMS – Solution is on the way to become open source to foster module development by third parties, we also provide blockchain ledger to connect marketplaces between one another – this bit of technology is build upon hyper ledger (IBM open source blockchain) + the possibility of cross-bordering. We are on the way to create ecosystem of regional ITC agro commodities marketplaces that facilitates domestic and cross-border buying and selling of agricultural commodities providing local points of price formation, agro indices, and back office paperwork (EDI). It aims to streamline the supply chain management and paperwork processes, save time and decrease risks of the trade participants, increasing their profits, decreasing costs and expanding geography of supply and demand. We use state-of-the-art technology solutions to address inefficiencies in agro commodity trade.

 Ukraine, Kyiv, 6 Shepeliyeva Mykoly street

Goal: Address agro commodity markets inefficiencies providing affordable supply chain management tools on the global scale.

How we do it:

- system checks via state registries companies and reps throughout registration process - only verified and authorized entities can buy and sell;
- system performs the check of product (in UA - warehouse receipts where applicable before each trade via state registries) ;
- system provides online communication tools to keep your record of bids and offers and to save communication time;
- system runs trade using blockchain – arguably the most efficient way to keep integrity of information and sell agro commodities quickly at best price at spot market .

How it works in UA: there are three market sections:

- quote driven market: offers to buy and sell, where registered and authorized users can either insert their offers to buy or sell, or they accept offers to buy or sell made by other participants, or negotiate the prices using inbuilt communication tool, for lots from 10 to 100 tones (with 10 tones increments);
 - upstairs trading, for large lots over 100 tones (with 100 tones increments), where security deposit is required from buyers and sellers to ensure the transaction;
 - reduction: trade driven market, where sellers start selling their product from any price they like, which is reduced every five minutes until the price reaches minimum reserve price or a buyer makes a bid before the price reaches the minimum.
- Anyone can view offers to buy and sell but can NOT see contact details of buyer or seller.

PRODUCT / SERVICES

AGROXY provides ITC solution and connectivity for FREE. Providing Local partner committed to marketing budget to promote their own marketplace.

Globally AGROXY embraces freemium business model and focused on growth strategy. In local markets, however, each business partner decides for himself how and when monetize trading platform service, one should find right balance between growth strategy and payable services – we believe that there is no one –to-foot-all-solution. Our major objective is to insure data security and integrity enabling local supply chain management turning into global standard.

Start Sep-by-step? Do your marketing homework on you envisaged country/ region then Study test platform from inside out. Make realistic plans as to market you want to develop domestic agro commodity trading. We recommend to have marketing budget from 10 USD on one active platform user with synergic effect starts with number of platform active user 3000+ , from that you can calculate your minimal marketing budget per year. Share your business plan with us and ask to initiate Local Partnering Agreement

How can I join in? Stage 1 Application for Partnership Stage 2 We carefully study business plan and prospects of regional business partners and form joint venture based on Local Partnering Agreement Stage 3 Platform deployment and customization Stage 4 Business growth in your local market Stage5 Starting with export import.

WE WOULD LIKE TO MEET:

Agroxy Tech Team does all hard work on customization of product, so we look **companies which are focus on marketing and business development in agro commodities: online trade platforms, online services in agro, online agro solutions, international trading, IT in agro, agro association.**
