CORPORATE PROFILE

BlackBerry is a company driven by ideas. BlackBerry and its subsidiaries and affiliates (“BlackBerry”) are committed to offering the best tools for communication and social collaboration and working towards minimizing our environmental impact.

With BlackBerry Enterprise Service 10, business leaders create value by empowering employees to be more productive and better equipped to serve customers. BlackBerry enables organizations to embrace consumerization by:

- Enabling enterprises to manage complex fleets of mobile devices
- Satisfying the full range of security needs; from a basic level up to very high levels of security and control
- Enabling a truly integrated voice, messaging, PIM, apps and social experience built for business users
- Delivering a comprehensive business and productivity app portfolio, an enterprise-grade app management framework and a low-cost app development environment.
- BlackBerry Enterprise Service 10 provides an integrated, end-to-end solution that perfectly balances end user and corporate needs.

CORPORATE PROFILE

C-COM Satellite Systems is a leader in the development and deployment of commercial grade mobile satellite-based technology for the delivery of two-way high-speed internet, VoIP and video services into vehicles. Founded in 1997, C-COM has developed a unique proprietary auto-deploying (iNetVu) antenna that allows the delivery of high-speed satellite-based Internet services into vehicles while stationary virtually anywhere where one can drive.

The iNetVu mobile antennas have also been adapted to be airline checkable and easily transportable. The company's satellite-based products and services deliver high-quality, cost-effective and reliable solutions for mobile applications throughout the world. Our transportable VSAT, vehicle mounted antennas provide 2-way high-speed Internet connectivity to a wide variety of users including: military, police, fire, homeland security, disaster management, oil and gas exploration, mobile medical services, emergency services, satellite news gathering (SNG), mining, construction, bookmobiles, mobile offices, recreation vehicles and many more.

No matter when, no matter where, when your application requires "must have" connectivity, the iNetVu can deliver.

CORPORATE PROFILE

ComStar provides custom innovative information security solutions to a broad range of institutions, including airports, education, government, and law enforcement. We leverage powerful technologies, such as GPS, 4G, licensed frequency, RFID and other state-of-the-art technologies, to build flexible, reliable, convenient and secure systems, with uses ranging from automation to identification to active/passive tracking. Our custom solutions include access control, forensics, surveillance, speed and red-light enforcement, e-government (ex: e-passports, e-gates, etc.), security through cryptography, mobile/desktop secure application development, audio/video collaboration and much more.

We work with our clientele one-on-one to guarantee results and ensure satisfaction.

ComStar brings you the solutions of tomorrow today.

CORPORATE PROFILE

GloberTel's Glober Platform is a turnkey unified mobility communication platform that enables highly modern value-add services (VAS) for mobile, fixed-line, VoIP, Internet, and IPTV service providers to deliver to their subscribers and to expand their customer base.

The Glober Platform provides quick-ROI via its new revenue generating offerings and low cost of integration and adoption. Hosted locally or in the cloud, it can also be adopted by enterprises for lowering their overall communication costs while providing unprecedented mobility and productivity to their employees globally.

The platform integrates current communication solutions including IM tools such as Skype and Messenger, all leveraged under one portal. In addition, the platform provides users with endless innovative features such as international WiFi roaming, mobile softphone apps for voice and text, Active Mobile Extension, and chosen preserved calling identity across all communication networks worldwide.

CORPORATE PROFILE

Communication Components International (CCI) is a leading provider of innovative, cost-effective, revenue increasing RF solutions for cellular (mobile) infrastructure, providing network equipment for 2G, 3G and LTE co-location, coverage enhancement, capacity improvement, interference reduction, spectrum re-farming and new technology introduction.

With thousands of field-proven solutions, CCI brings expertise to the demanding needs of today's wireless operators, allowing operators to accelerate deployments whilst lowering costs and improving performance. Low cost, rapidly deployable, fit-for-purpose CCI product solutions bring increased revenues by maximizing the use of RF spectrum and power. Recent portfolio additions are patented bi-sector array antennas and next-generation portable PIM analyzers.

Pedro Salles

Sales Director, Europe
pedro.salles@dragonwaveinc.com

CORPORATE PROFILE

DragonWave's point-to-point packet microwave networks deliver unprecedented capacity and spectral efficiency, meeting the increasingly stringent requirements of carrier-class operators. For operators looking for a gradual evolution from TDM to packet-based networks, DragonWave offers hybrid solutions, supporting native TDM and IP, as well as multiservice gateways.

Responding to the unique requirements of microcellular networks, DragonWave has also developed the industry's first fully integrated microcellular platform and urban-optimized backhaul solutions, designed to meet strict city-zoning requirements.

Known in the industry for leading capacity, spectral efficiency and reliability, DragonWave's backhaul solutions scale to multi-gigabit capacity and offer multiple protection options, including ring and mesh architectures, to ensure carrier-grade availability levels. Our solutions cover a wide range of licensed and licensed-exempt frequencies from 2.3 GHz to 80 GHz.
